

COMP10050 Assignment3 Description

Nan Wu 18210184

This assignment requires to use CUnit to design test cases. There are 5 cases for each test suite, including single one element which is positive and negative, and multiple elements which are lower, equal and greater than 0.

Max test is failed because when the elements in the array is equal or lower than 0, the test is failed.

Average test is failed because then the elements in the array is not equal to 0, the test is failed.
